

# BlockLock System

*For Enhanced Wall Strength*

Conigliaro Block's **BlockLock System** adds considerable muscle to installed Plas-Crete or Standard Concrete Block Walls.

The BlockLock System includes:

- 1) Internal Bollard Tubes which are pre-cast into the Plas-Crete or Standard Concrete Blocks during the manufacturing process.
- 2) Steel Soldier Pins of various lengths are inserted into the Internal Bollard Tubes and down into the ground surface.
- 3) GlassLock granules are poured into the Internal Bollard Tubes around the Steel Soldier Pins locking them into place.

1 1/2" diameter Internal Bollard Tubes are pre-cast into each Block

3/4" diameter Steel Soldier Pins are inserted through all wall courses and into the ground

**Please contact our Sales Department to learn more about our BlockLock System.**
